WE CARE ABOUT YOUR INTIMATE CARE

On a business trip to Switzerland in 1959, Manchester-based builder Robert Willan came across a 'fancy throne'. He was fascinated by the concept of personal hygiene it delivered, to the extent he returned to Switzerland specifically to meet the inventor, Hans Maurer. The rest, as they say, is history.

In 1962 Robert Willan founded Closomat in the UK becoming a wash & dry toilet pioneer. Closomat has grown to become the brand leader in an entirely new experience of freshness and cleanliness – the aspirational standard in intimate care and hygiene.

The Closomat principle has since spread worldwide. Closomat remains the biggest-selling wash & dry toilet in Britain, delivering unrivalled quality, consistency and performance through efficient flushing, unequalled washing functions and effective drying technology.

The Closomat company is still owned by the Willan family, and is based in the UK.

Our Manchester head office and customer support centre is the hub for a network that includes the only purpose-built wash & dry toilet production and assembly facilities in Britain, and a nationwide network of in-house sales and service teams.

We have a vision to enable everyone to deal with their intimate toileting needs with as much style, independence, dignity and control as possible, at home and away, however big or small the space.

It is our mission to deliver that vision with the highest level of professional yet personal service for the whole life of our relationship with you, from initial advice, consultation, through installation, to future service & maintenance.

Closomat: the ultimate in intimate cleanliness.

A handwritten signature in black ink, appearing to read 'B Hoare', written in a cursive style.

Brian Hoare
Managing Director

CLOSOMAT HYGIENE SYSTEM

DOES IT ALL

Wash & dry toilet hygiene at the highest level. Closomat not only invented it, but has also continuously perfected it. The result is the Closomat Hygiene System. At the heart of the innovation is the self-cleaning stainless steel shower nozzle. With a showering flow rate of up to eight litres per minute, followed by warm air drying, it ensures cleanliness and well-being.

Maximum quality

Advanced engineering, high-quality materials, careful craftsmanship and a design of timeless beauty - these create the framework for the Closomat experience. Behind it stands British craftsmanship and Swiss engineering for a better quality of life – every day.

Unique comfort

You sit comfortably and upright on the Closomat. When you're ready, trigger the flush: the wash & dry toilet cleans you thoroughly and comfortably with warm water and dries your skin gently with warm air.

Best shower feeling

The powerful pump system and smooth spray of the Closomat are designed to ensure your intimate areas are effectively cleaned to a consistently high standard, without cross contamination of body waste.

Perfect hygiene

The self-cleaning Closomat nozzle system is unique and guarantees the highest standard of cleanliness.

Automatic flushing

This is triggered automatically after the start of the showering process. Only with Closomat does the showering and drying process take place over a freshly rinsed toilet bowl.

Easiest operation

Closomat wash & dry toilets are easy and intuitive to use. They provide hands-free cleaning. Stay seated and trigger the process.

A real experience

The Closomat experience is pure pleasure. It will surprise and refresh you. It stimulates blood flow and cleans you perfectly and hygienically. It can stimulate bladder and bowel movement. Anyone who has experienced the feeling will not want to do without it.

CLOSOMAT ASANA

THE CLOSOMAT EXPERIENCE IN A CLASS OF ITS OWN

Closomat Asana meets the highest standards of hygiene, engineering, functionality, comfort and a long serviceable life. A multi-functional wash & dry toilet with exclusive additional functions and perceptible benefits.

Closomat Asana is equipped with an elegant, easy-to-use soft-close seat. The Closomat Hygiene System with all shower functions also offers odour extraction, shower spray boost, lady-shower and a wellness programme for cleaning and massage which enhance your well-being: rotating, pulsating and hot – cold – hot shower spray options.

With your wireless remote control in your hand, you can enjoy the Closomat shower experience without cables or batteries.

CLOSOMAT ASANA

FEATURES

Soft-close seat

The toilet seat and lid can be raised and lowered gently and without resistance. A light touch is sufficient. The integral shock-absorbing elements prevent the seat and lid from closing with a sudden impact.

Temperature-controlled shower water

The smart water heating with an energy-efficient boiler ensures that the shower water is perfectly temperature-controlled. For up to 45 seconds, even with shower flow rates up to 5 litres/minute.

Automatic flushing

This is triggered automatically after the start of the showering process. So only with Closomat does the showering and drying process take place over a freshly rinsed toilet bowl.

Automatic odour extraction

Extraction starts when you sit down. Odours are neutralised by an active carbon filter.

Warm air drying

The temperature is gradually reduced. A pleasant feeling, as the drier the skin becomes, the cooler the air is.

Gently cleaning lady-shower

The lady-shower function triggered by touching the push-button provides a much appreciated feeling of freshness. When the push-button is held down, the gentle shower spray can last for exactly as long as you wish. The air drying function starts automatically after showering.

Ambient light

The blue arc of light projected onto the floor indicates that the wash & dry toilet is switched on. At night-time, the soft Closomat ambient light helps you find your way without having to put a bright light on.

Housekeeping function

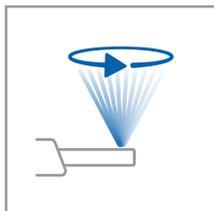

Every seven days, the Asana's boiler briefly heats up beyond its normal operating temperature in order to eliminate the potential build-up of bio-films.

This automatic function allows you piece of mind that your toilet is as safe and clean as it can be.

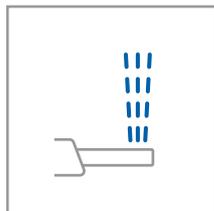

Wellness programme

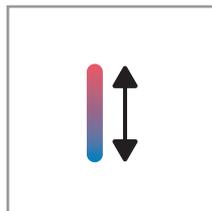

Whilst the shower is running, four wellness functions can be switched on. The vertical shower spray can rotate or pulsate. The temperature-changing shower spray and the opportunity to combine all the wellness functions provide a revitalising massage, as well as thorough cleaning. The Closomat shower experience – in a class of its own.

THE CLOSOMAT EXPERIENCE

AESTHETIC PLEASURE

Flush plates

Beauty in operation.

The Closomat Asana has a range of flush plates*. Sleek and stylish, they combine form with function.

Oyster

In chrome-plated finish, its pneumatic push operation gives dual flush options in a slimline unit.

Remora

The brushed stainless steel plate has palm-push button options to select the preferred flush of two options.

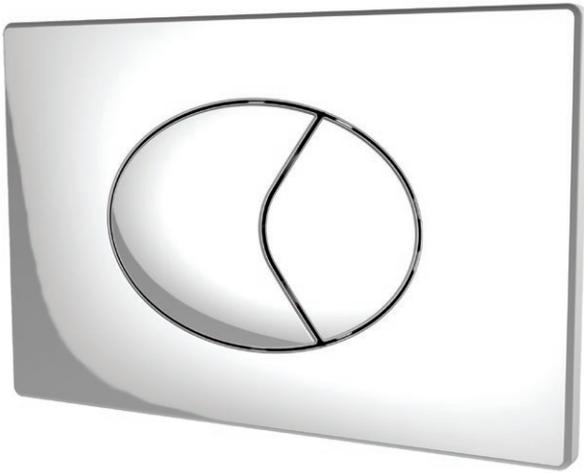

Wave s1

The sleek, brushed stainless steel plate uses passive (infra-red) technology: just 'wave' your hand in front to trigger your selected flush option.

Wave s3

The state of the art mechanism comes to life in your presence! It's ready for operation when the lights are blue; successfully triggered to flush they turn green, and red whilst the cistern refills.

*any of our flush plates can either be integrated into the wall/plasterboard in front of the concealed cistern, or inset into any of our bespoke cistern panels.

CLOSOMAT PALMA VITA

THE CLOSOMAT EXPERIENCE AS STANDARD

The Closomat Palma Vita. Definitive, classic, floor-standing system, popular with our customers for being uncomplicated! It is easy to use and has been tried and tested for many years. The timeless design enjoys pure, sleek lines.

Closomat Palma Vita can also be adapted for people with restricted mobility by adding the appropriate accessories, at initial installation and later, as needs change.

Everyone is different, with different needs. Closomat wash & dry toilets are the only ones of their kind that can be personalised to individual requirements. They can be adapted at initial installation and later, as needs change. Over 150,000 permutations exist.

It is the only toilet of its kind, specifically developed for elderly and disabled people, that is designed to properly support the user AND position them correctly for effective washing and drying.

-
- Closomat's unique ^{one}touch system allows the user to benefit from the toilet's automatic functions by just pressing and releasing the elbow pad
 - Easy to use regardless of manual capability/dexterity
 - Removes hand:body contact and risk of faecal contamination
 - Enables the user to toilet with little or no help
 - Can be used by all members of the household
 - Safe working load: 190kg/30st

Bariatric Palma Vita (with Big John seat)
Safe working load: 362kg/57st.

CLOSOMAT LIMA VITA

THE CLOSOMAT EXPERIENCE IS WITH ELEGANCE

The Closomat shower experience in the form of a complete wall-hung unit. Where timeless design and sophisticated engineering meet. The integral Closomat Hygiene System cleans beautifully and thoroughly, creating a sense of well-being. This tried and tested wash & dry toilet is simple and easy to use. The elbow buttons trigger WC flushing and the shower with hot air drying afterwards. No distractions. Everything is functional, reliable and designed for a gentle cleaning effect.

-
- Wall-hung version of the Palma Vita
 - Enables unit to be fixed at exact height required by the user
 - Ergonomically designed to properly support the user
 - Ideally suited for underfloor heating
 - Facilitates bathroom/wetroom floor cleaning
 - Can be used as a conventional WC
 - Safe working load: 190kg/30st

WASH AND DRY

THE HEART OF THE CLOSOMAT EXPERIENCE

The heart of our toilets is the washing and drying experience: the most effective available in the UK.

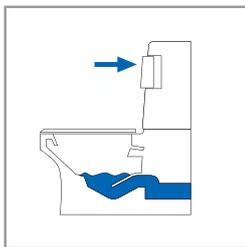

We promise a powerful, effective jet of warm water that allows for maximum suitability across a wide range of end-user requirements.

Uniquely our range of douche arms provide a vertical jet of water ensuring it is directed exactly where *you* need it.

Precisely machined from strong and rust-proof stainless steel, the spray arm is self-cleaning, and smoothly retracts into the porcelain pan when not in use.

The warm water washing is followed by thorough warm air drying - so you are left with the ultimate feeling of cleanliness and freshness.

SEATING

THE CLOSOMAT EXPERIENCE WITH OPTIMUM COMFORT

Are you sitting comfortably?

Sitting in the right position, and comfortably, encourages easier bladder and bowel movement. All our options are supplied as soft seats to enhance the toilet experience. All are supplied in a dark blue colour to aid users with visual impairments.

Junior seat:

A smaller centre aperture ensures the child is properly supported over the pan without risk of buttocks slipping through the opening.

Adult seat:

A standard sized seat with 'soft feel' to optimise comfort.

Adult Open Fronted seat:

The open front improves hygiene. It reduces surface area for potential urinary 'splashback'. It enables a male to accommodate his anatomy more comfortably. It facilitates effective wiping (if chosen over douching) for a female.

Bariatric 'Big John' seat:

With its wider sitting area, this seat gives appropriate, comfortable buttock support for the larger user.

OPERATING MECHANISMS

EVERYONE IS DIFFERENT WITH DIFFERENT NEEDS

Closomat wash & dry toilets are personalised to individual requirements

Touch Sensitive Hand/Foot Switch:

This device is for those users who are unable to use the standard elbow pads. Air operated, no electricity is required to operate it, only very light pressure.

Proxy Switch:

Making use of "passive technology" the Closomat Proxy Switch allows users with little or no grip to activate the unit, simply by passing their hand/body-part in front of the sensor.

Plinth:

Plinths are used to raise the whole unit. For use with a shower chair or to aid direct wheelchair transfer.

Plinths come in heights of 25mm, 50mm, 75mm and 100mm.

Infrared Remote Control:

This simplistic 'one button' style Infrared Control provides a versatile option lending itself particularly well when used by carers.

Infill Panel:

The Infill Panel has been designed to aid installations where pipe-work inhibits the Palma Vita from being located against the wall.

The Infill Panel is available in thickness sizes 25mm, 50mm & 75mm. The infill panel is 100mm taller than the Palma Vita. It must be cut from the bottom to suit finished toilet height.

THE VITA SUPPORT RANGE

TAILORED TO MEET YOUR NEEDS

Integrated Fold-down Support Arms:

Integrated Fold-down Support Arms. Robust and secure support arms designed and manufactured specifically for the Closomat. This convenient support system not only folds out of the way to aid side transfer from a wheelchair, it also has a number of additions that can further aid the user's stability. A lap strap is also available. Integrated Fold-down Support Arms are ideal for installations where wall construction is poor.

Soft Arm Sleeves:

Easy to fit, the Soft Arm Sleeves provide a comfortable, hygienic and stylish dimension to the Integrated Fold-down Support Arms.

Lateral Body Supports:

These easily adjustable and comfortable additions help to provide extra support and stability to the user, in conjunction with the Integrated Fold-down Support Arms.

Integrated Slimline Support Arms:

With the ability to fold away independently of each other, these Integrated Slimline Support Arms provide close proximity support, whilst looking clean and smart. Their elliptical shape offers an 'easy to hold' profile making getting on and off the toilet a much easier task. Covered in a 'warm feel' coating these robust metal arms provide safety and comfort all year round.

Raising pommel:

Easily attached, this robust elevated pommel allows for that little extra height-support when either getting up from or down to the toilet.

Toilet roll holder:

With the ability of being easily moved from one arm to the other, this simple toilet roll holder is the perfect addition to the toilet support arms.

DEDICATED CUSTOMER SUPPORT SERVICE & MAINTENANCE

Every Closomat is thoroughly tested by our factory in Manchester prior to dispatch and is ready to be used by the client as soon as it has been installed and switched on. As part of our commitment to delivering the ultimate in intimate care, we prefer to "commission" every unit.

For the client

- Our experienced engineer will demonstrate the Closomat to the client and advise them how to get the best out of its use.
- Our engineer will change settings on the Closomat to the client's preference if required.
- Our engineer will explain to the client Closomat's commitment to ongoing support and how to access this.
- It introduces our local engineer who will support the client with their Closomat going forward.

For the specifier

- Our engineer will ensure that the Closomat meets their specification, they will advise you if it differs.
- Our engineer will inspect the installation and, if the Closomat has been installed correctly, issue a commission certificate, which will form part of the O&M manual.
- Our engineer will highlight any potential problems with the installation. In the worst case scenario they will make it safe.

For the installer

- The commission certificate is recognition of a job well done and we will pick up any issues with the product going forward.
- We will highlight any areas you need to address.

Installation can be carried out by ourselves, or a competent person. We commission every unit (included in the purchase price). We spend time with you, explaining how the equipment works.

Uniquely we have our own, nationwide team of maintenance engineers to give you the confidence and peace of mind of a full service back-up.

Service contracts are available for 1-5 years, and can be paid annually or monthly.

Dedicated customer support line: 0800 374 076.

Office hours are Monday-Friday 9.00am-5.00pm; after hours an answerphone service operates, which is checked regularly and messages actioned as quickly as possible.
